PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate and Certified Python Full Stack Developer (QSpiders) with hands-on experience in Python, Django, SQL, HTML, CSS, and JavaScript. Developed a Django-based Student Management System with full CRUD functionality and a responsive Restaurant Website using HTML5 and CSS3. Works with MVC architecture, RESTful concepts, and relational database design to build functional, structured web applications.

EDUCATION

Sri Sankara Arts and Science College, *Bachelor of Science in Computer Science* 2022 – 2025 | Kanchipuram
70.44%

Govt. Hr. Sec. School, *HSC (Class XII)* 2020 – 2021 | Kanchipuram
80%

Govt. High School, *SSLC (Class X)* 2018 – 2019 | Chembarambakkam
70%

TECHNICAL SKILLS

Languages: Python, JavaScript (basic), SQL

Backend: Django, MVC Architecture, CRUD Operations, Django Admin

Frontend: HTML5, CSS3, JavaScript, Responsive Web Design

Database: SQL, SQLite, Relational Database Design, Query Writing, Data Integrity

Tools & Version Control: Git, GitHub (Basic), VS Code

Concepts: Object-Oriented Programming, MVC, Client-Server Architecture, Data Cleaning Fundamentals, Problem Solving

PROJECTS

Student Management System — Full Stack Web Application

Technologies: Python, Django, SQL, SQLite, HTML, CSS

- Engineered a full stack web application using Django (backend) and HTML/CSS (frontend) with 4 linked database tables.
- Developed 15+ SQL queries to implement Create, Read, Update, and Delete (CRUD) operations on student data.
- Designed the application using MVC architecture, separating models, views, and templates for maintainable code.
- Configured secure, role-based authentication and access control using the Django Admin panel.
- Integrated backend data with frontend views using Django templates for real-time data rendering.
- Maintained data integrity and consistency across 500+ student records through structured database design.

Job Portal Web Application

Technologies Used: Python, Django, HTML, CSS, JavaScript, SQLite

- Developed a web based Job Portal application using Django which enables users to view and search for jobs.
- Designed and developed user registration and login system with special features for job seekers and recruiters.
- Developed modules for job posting, job listing, job search and applications.
- Designed an aesthetic and responsive portal using HTML, CSS and JavaScript.
- Used SQLite for storing and managing users' data and application details.
